-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3683

1. Receipt is acknowledged of the preliminary amendment filed on 1/27/2004.
2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

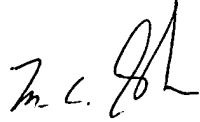

3. Claim 23 is rejected under 35 U.S.C. 103(a) as being unpatentable over Lech, Jr.

Lech shows a clutch including a rotor, a brake, a biased retaining member 44 having at least one section that is insertable into the rotor for retaining the hub with respect to the rotor. The claimed invention differs only in the type of rotor. It would have been obvious to one of ordinary skill in the art to have utilized a retaining system as shown by Lech in a brake rotor instead of a clutch rotor because brake and clutch parts are well known to be interchangeable.

4. Claims 1-22 are allowed.
5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Stark and Millard show retaining members of the type claimed.

Dagh et al and Taylor show retaining clips utilized in brake systems.
